This is the first image of a black hole that resides at the center of the galaxy M87, obtained using the Event Horizon Telescope. The image shows a bright ring formed as light bends in the intense gravity around a black hole that is 6.5 billion times more massive than the Sun.

This is a trans-Neptunian object located in the Kuiper belt. This is the most distant object ever explored. It is approximately four billion miles from Earth. Its appearance, is unlike anything astronomers have observed. It illuminates the processes that built the planets four and a half billion years ago.

Evrin Ağacı has one of the largest popular science collections (especially on evolution) available for free. You can read the most important & educative articles in the “Evrin Ağacı Academy” project.

This is Comet 2I/Borisov – whose speed and trajectory indicates it is from outside of our Solar System.
This is the second interstellar object confirmed in our Solar System. It hosts water.

COMET 2I/BORISOV
NASA, ESA and D. Jewitt (UCLA)

September 2020

Evrin Ağacı has its own podcast platform, as well as releasing regular podcasts on Spotify, iTunes, & Google Podcasts.

This carved-out cloud of gas and dust has been nicknamed the “Jack-o’-lantern Nebula” because it looks like a cosmic hollowed-out pumpkin. Powerful outflows of radiation and particles from a massive star — known as an O-type star and about 15 to 20 times heavier than the Sun — has likely swept the surrounding dust and gas outward, creating deep gouges in the cloud.

Evrim Ağacı was founded in Turkey in 2010, it currently serves millions of science enthusiasts from all around the world.

A collection of gas and dust over 500 light-years across, the Perseus Molecular Cloud hosts an abundance of young stars.

 Evrim Ağacı has a Q&A section where science enthusiasts can interact through asking or answering questions.

“It has been said that astronomy is a humbling and character-building experience. There is perhaps no better demonstration of the folly of human conceits than this distant image of our tiny world. To me, it underscores our responsibility to deal more kindly with one another and to preserve and cherish the pale blue dot, the only home we’ve ever known.”

- Carl Sagan, Pale Blue Dot: A Vision of the Human Future in Space
